

Assignment 6

In a group of 2 students, implement a Tip Calculator that tells you, how much you may give to a waiter/waitress dependent on your bill.

Give a tip of about 5% but give always more than 50ct and do not give more than 5€. Round the final amount up to the next full Euro. Display the final amount and the tip.

Submit your solution via email to thues@cs.rwth-aachen.de. Clearly state all names of the students who have worked on the assignment in the email. Before submitting, compress the project and verify that all project files (esp. resources) are included in the archive.
