Der Treidler repräsentiert eine wichtige historische Arbeiterfigur Handelsmetropole Regensburg. Männer wie er zogen bis ins frühe 19. Jahrhundert in großen Trupps und hoch zu Ross mit Tauen aneinander gebundene Schiffe über die Donau. So ein Tross bestand aus bis zu 40 berittenen Zugpferden und transportierte meist Güter wie kostbares Salz.

Dabei waren die wochenlangen Reisen der Männer nicht ungefährlich, denn überall lauerten Diebe und Halunken. Nach einer solchen Salztour legten die Treidler beim Salzstadl an und halfen beim Entladen der wertvollen Fracht. War das Weiße Gold dann eingelagert, reparierten sie dort ihre Boote

Weitere Informationen über den Treidler und den Salzstadel finden Sie auf folgenden Webseiten:
