

Search Input and Result Visualization on Hybrid Document Systems

Hybrid Document Systems are a combination of multitouch tabletop systems and physical documents and are a hot topic in the area of Human-Computer Interaction.

You will create and evaluate new search input methods and result visualizations.

You:

- have heard at least DIS1
- know about multitouch interfaces
- are ambitious about the topic
- are able to work hard and creatively

We provide:

- regular supervision (no hand-holding)
- a great environment
