

Diploma / Master Thesis

We...

...are searching for a student to take part in an ongoing research project concerning new interaction techniques and visualization methods that enhance IDEs.

Your task,

should you accept it, is to build a sketching application for programmers. With it, developers can quickly integrate drawings into their IDE and link to source code fragments.

You...

- have an eye for good visual design,
- have some experience in the field of Human Computer Interaction,
- have solid programming experience, preferably C++, Objective-C and the like,
- are interested in developing for Mac, iPhone, and iPad,
- want to develop a program that people will really want to use!
