

SwiftAlyzer

Supporting your #SwiftLang Architecture Reviews

CHRISTOPHER GRETZKI

- > started GWBasic (DOS) as a child
- > studied computer science @RWTH
- > developed iOS first with iPhoneOS 2.0 as „HiWi“
- > crafting own apps @9elements agency
- > today: certified software architect @adesso mobile

FROM SHORT LIVING PROJECTS OF SOME MONTHS TO
LONG TIME PROJECTS OF SEVERAL YEARS

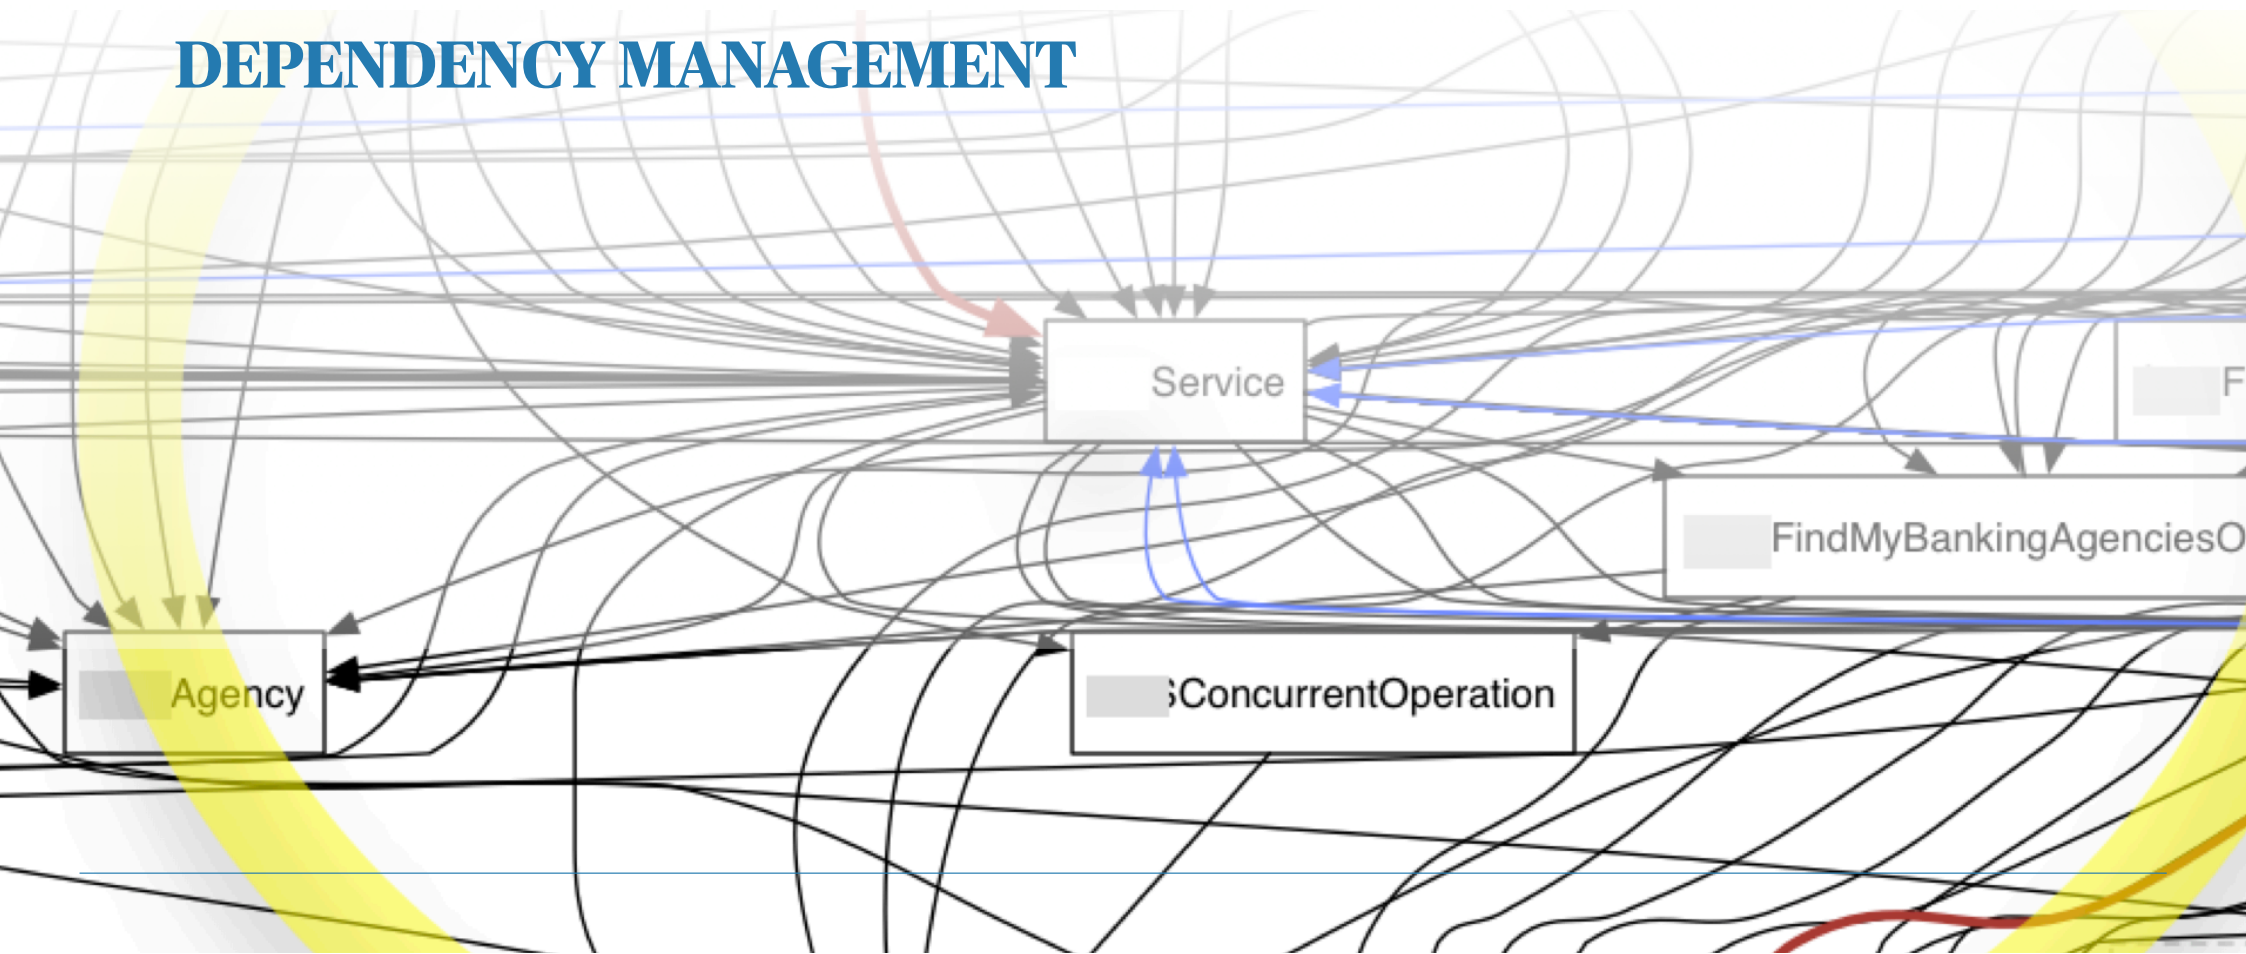

FROM OWNING PRODUCTS AND DECIDING ON KPIS
TO REQUIREMENT ENGINEERING FOR FOREIGN
STAKEHOLDERS

CHALLENGES

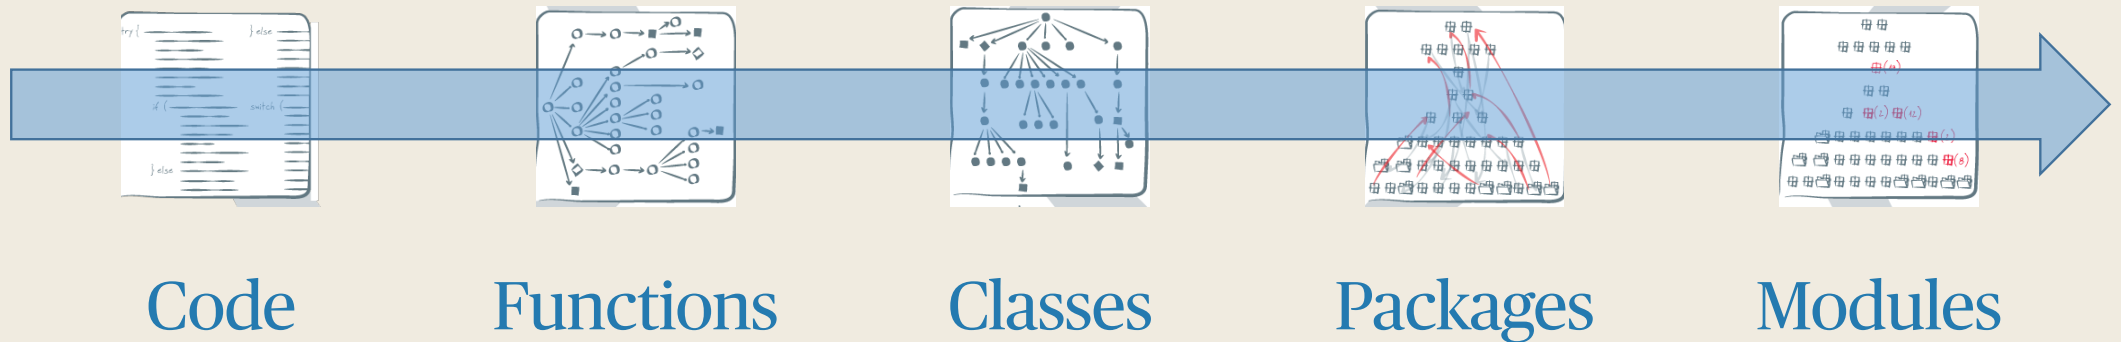

1. Diverse coding styles
 2. Diverse skill levels
 3. Diverse understanding of the features
 4. Error-prone code
 5. Diverse semantics
 6. Different names for same things
 7. Code hard to extend or maintain
 8. Code hard to understand
 9. 90/10 Rule of thumb
 10. Fulfilness of customer's requirements
-

CHALLENGE

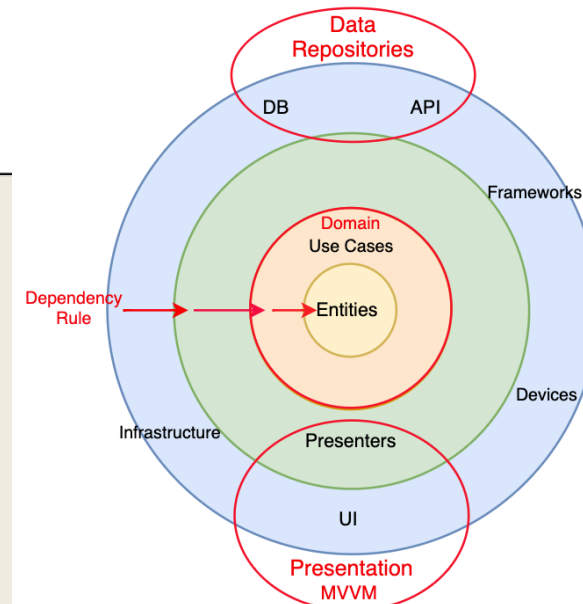

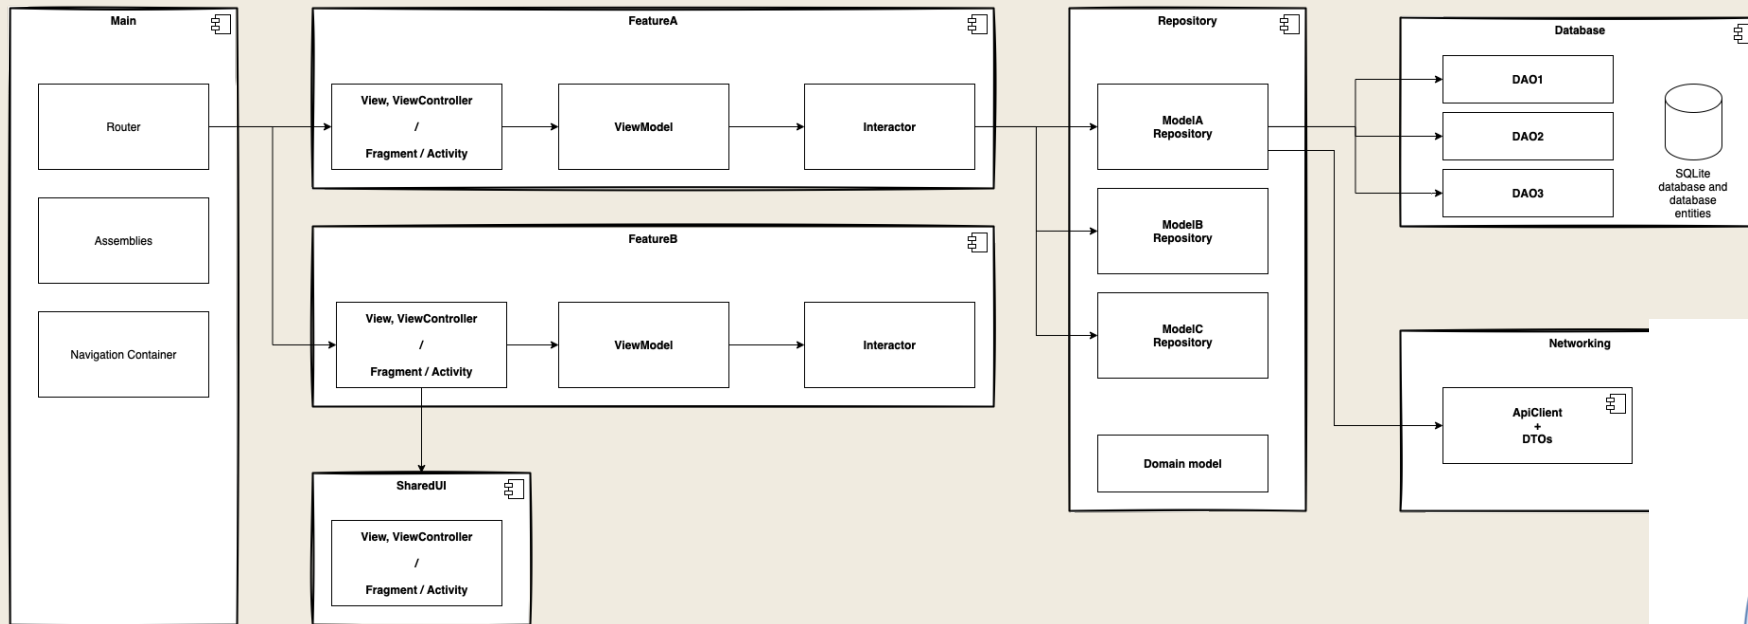

DEPENDENCY MANAGEMENT

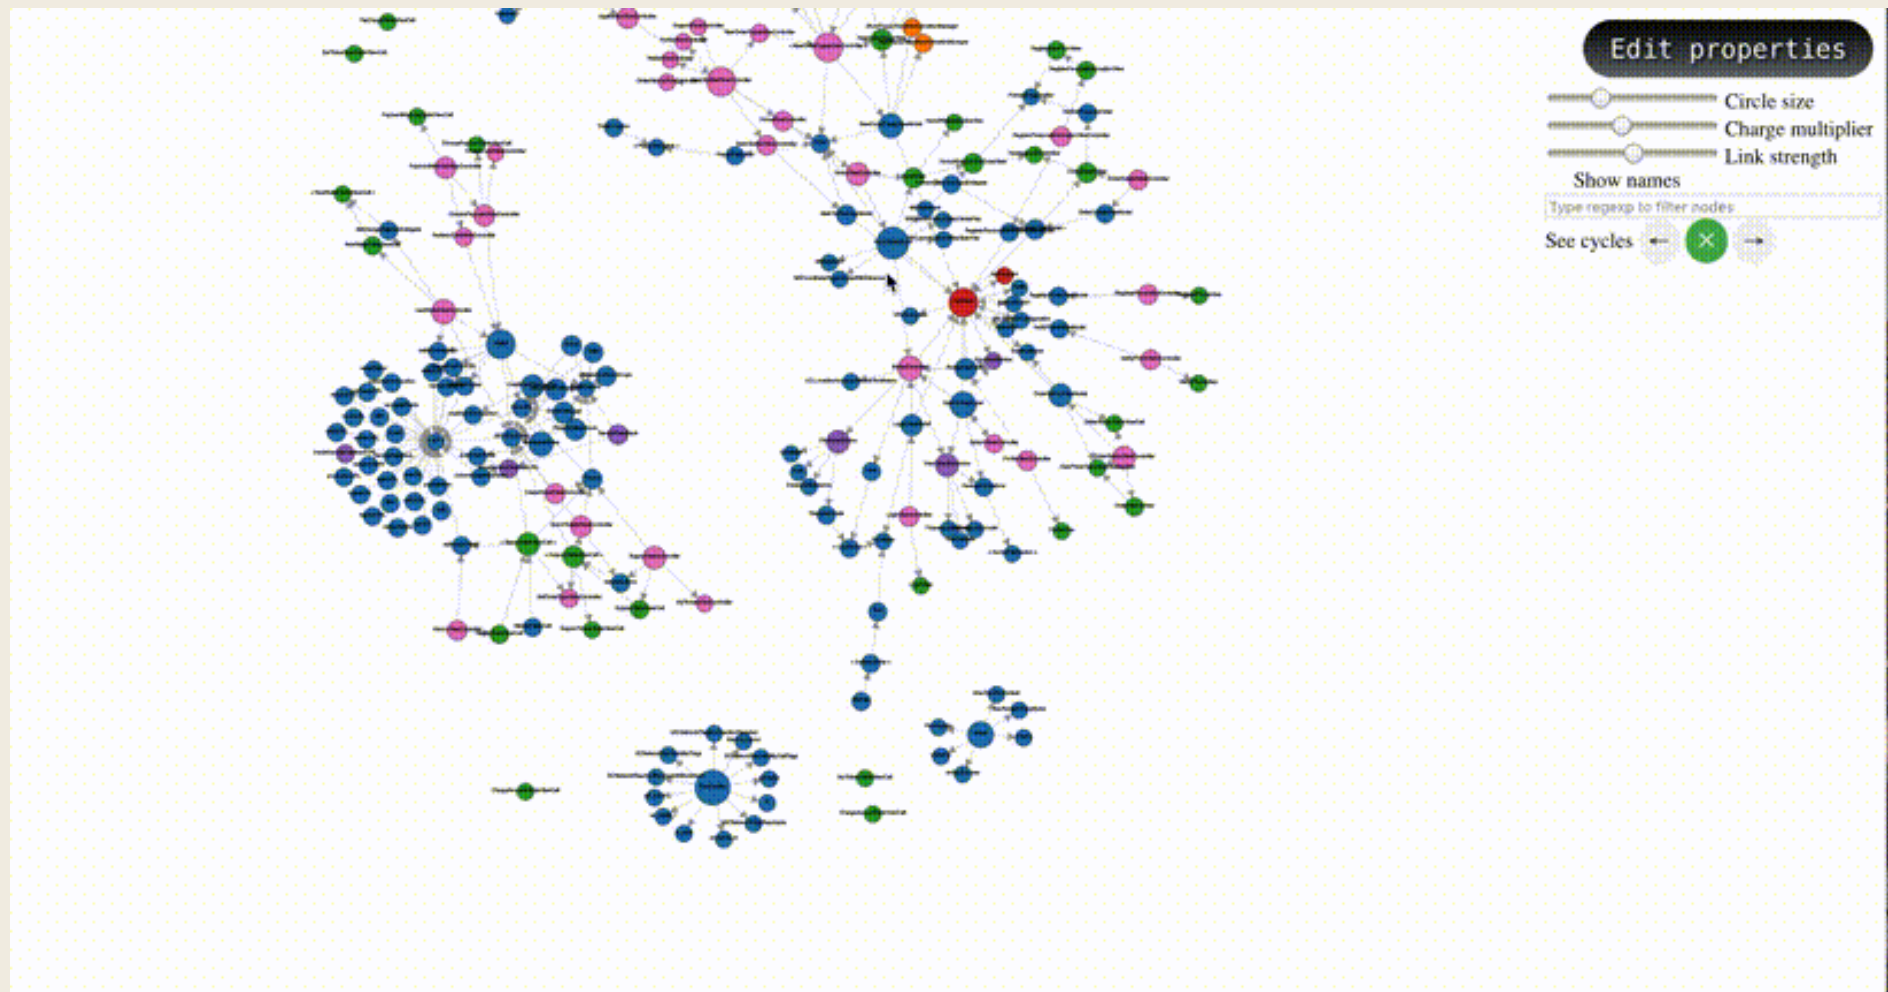

ARCHITECT'S PLAN vs HACKING

BUILDING BLOCKS

DEMO TIME

Usecases for SwiftAlyzer

- Analysing ongoing development - reality check of planned architecture
 - Onboarding new developers - always more up to date than any documentation
 - Evaluating new projects
-
