NSMetadataQueryAttributeValueTuple Class Reference

Inherits from	NSObject
Conforms to	NSObject (NSObject)
Framework	/System/Library/Frameworks/Foundation.framework
Availability	Available in Mac OS X v10.4 and later.
Companion guide	Spotlight Metadata Attributes Reference
Declared in	NSMetadata.h

Overview

The `NSMetadataQueryAttributeValueTuple` class represents attribute-value tuples, which are objects that contain the attribute name and value of a metadata attribute.

Attribute-value tuples are returned by `NSMetadataQuery` objects as the results in the value lists. Each attribute/value tuple contains the attribute name, the value, and the number of instances of that value that exist for the attribute name.

Tasks

Getting Query Attribute/Value Information

- [attribute](#) (page 6)
Returns the receiver's attribute name.
- [count](#) (page 6)
Returns the number of instances of the value that exist for the attribute name of the receiver.
- [value](#) (page 6)
Returns the receiver's attribute value.

Instance Methods

attribute

Returns the receiver's attribute name.

- (NSString *)attribute

Return Value

The receiver's attribute name.

Availability

Available in Mac OS X v10.4 and later.

Declared In

NSMetadata.h

count

Returns the number of instances of the value that exist for the attribute name of the receiver.

- (NSUInteger)count

Return Value

The number of instances of the value that exist for the attribute name of the receiver.

Availability

Available in Mac OS X v10.4 and later.

Declared In

NSMetadata.h

value

Returns the receiver's attribute value.

- (id)value

Return Value

The receiver's attribute value.

Availability

Available in Mac OS X v10.4 and later.

Declared In

NSMetadata.h

Document Revision History

This table describes the changes to *NSMetadataQueryAttributeValueTuple Class Reference*.

Date	Notes
2007-04-02	Made editorial improvements.
2006-05-23	Added cross-reference to companion document.
	First publication of this content as a separate document.
